

# Digital displays key benefits

**Clear viewing**

With ultra-high efficiency and reliability, the Horizon delivers visual performance with seamless integration allowing scale and over 4.4 trillion colours.

**Customisable**

Control your own display by choosing from a range of pixel pitches, sizes and multiple input options including DVI, HDMI, SDI and DP.

**Conscientiously crafted**

Profile aluminium material offering the best balance of strength, heat transfer and light weight. Horizon Sport options include an outer layer of soft rubber specially designed for sporting applications to avoid injury from collision.

**Wide viewing angle**

Presents a wider viewing angle by using 3-in-1 SMD LEDs, creating more value for advertisers.

**Weather assurance**

Stable even in extremely hot and humid weather conditions due to best-in-class heat dissipation from the hollowed-out design, and waterproof meaning rain, hail or shine VAILO digital displays will work for your event.

**100,000 lifetime hours**

The Horizon range delivers over 100,000-hour lifespan in extreme conditions.

**Warranty**

Warranted for a minimum three years.

**Ease of maintenance**

Front or rear maintenance, making it easier to operate no matter the application.

**IP rated**

VAILO Horizon products are Ingress Protection rated to provide reliable performance in the harsh Australian conditions, protecting against environmental factors such as temperature, dust and water.

**Premium componentry**

VAILO LED displays are manufactured utilising premium components to ensure market-leading visual impact, reliability and longevity.

**Software solutions**

Whatever the application, VAILO can supply a software solution to drive and seamlessly deliver content to your digital display.

**Turn-key ready**

VAILO can deliver a turn-key solution providing concept, design, product, install, control system integration and support of your LED digital display, supplied as permanent, temporary or a mobile structure.

**Quality control**

As a manufacturer of LED lighting, we have rigorous quality control systems and standards for our suppliers, ensuring the delivery of high-quality products while adhering to our Modern Slavery Policy. We follow to this same level of standards when choosing LED digital display suppliers.
